

SOLUTIONS IN PRACTICE

ROBINA TOWN CENTRE, QLD

Robina Town Centre has claimed the title of Queensland's biggest and most expensive food court. The \$160 million development saw 40 fresh food retailers, cafes, bars and restaurants, with purpose-built open kitchens added to the 14,000sqm of additional floor space.

The lavish redevelopment demanded products which maintained the upmarket feel and contemporary design of the centre. A shallow drainage solution was required to meet the depth restrictions of suspended slabs. Hydro was able to offer LS1000/60 from our Solution range, it's overall depth of 60mm was ideal for this application. The use of stainless steel grating ensured long term value, hygiene and an aesthetic appearance. To preserve the visual continuity of the external tiles, single and multi-part covers were supplied with a decorative stainless steel edge for an enhanced look.

Additionally, being a high traffic area for pedestrians, Hydro supplied Heelguard SureGrip Grating to help prevent public falls and injuries.

Mea Solution

Products Used:

- Hydro Solution LS1000 with Stainless Steel Heelguard SureGrip Grating
- Hydro Stainless Sump Grates and Frames
- Hydro Covers Single and Multipart Covers with Stainless Steel Decorative Edging
