

# NORTHERN ROADS UPGRADE

### PROJECT:

Stage 1 of the Northern Road Upgrade was an essential investment in Sydney's south-western roads. The first stage saw 3.5 kilometres of the Northern Road between the Old Northern Road at Narellan and Peter Brock Drive at Oran Park upgraded. The new road will lead to the Western Sydney Airport, once opened in 2026.

Hydro Constructions Products was extremely proud to be awarded the supply contract with Georgiou Group for an excess of 7000 meters of drainage products. This essential \$1.6 billion upgrade currently serves around 15,000 motorists each day.

### SOLUTION:

With our population centres separated by vast distances, road transport infrastructure is critical to sustaining Australian communities. With a project brief that emphasised safety, Hydro Construction Products supplied our classic MEA c3000 Polymer Concrete channel with Ductile Iron High-Flow Profix Grates.

High Flow Profix Grates by Hydro offer improved safety for motorists, as the reliable and simple single pin 'Profix' fastening mechanism ensures no moving parts, even under extreme conditions. With large aperture slots that are less susceptible to flooding, the High-Flow Profix Grate by Hydro truly guarantees no less than top performance.

**POLYMER 300 CHANNEL WITH IRON EDGE: C3000**

- Available in load classes up to Class D.
- Durable, strong and corrosion resistant.
- Manufactured to suit site specifications.

**DUCTILE IRON HIGH-FLOW PROFIX GRATE:723300**

- Includes KTL coating.
