

# SOLUTIONS IN PRACTICE

## QLD MAIN ROADS, TMR

**The Labrador-Carrara Road and Ashmore Road roundabout on the Gold Coast was recently upgraded to a signalised intersection to improve traffic flows and cater for future traffic volumes.**

Hydro Construction Products (HCP) worked in conjunction with Parsons Brinckerhoff and McIlwain Civil Engineering on the \$26 million upgrade.

HCP was able to assist the engineer in taking large volumes of water away from the surface of the road quickly and efficiently with a large aperture system. The new Pro-Fix Locking system is a unique device that is currently being used extensively on multiple projects throughout Australia. Pro-Fix can be fitted to a variety of HCP drainage channels and allows fast and easy access for routine cleaning and maintenance where time and safety is paramount.
